Dakhingaon, Assam | SPECIAL INVITEE |

Sri M. C. Deka, IAS, Director of Land Records & Surveys etc., Assam chaired the meeting.

Sri Ranveer Bora, ACS, Addl. Director of Land Records, Assam welcomed the members present and apprised the Committee of the petitions received from six firms against the NIT floated vide No. DLR.47/Procurement/M&E/2019/20 dtd.27/08/2019. The Addl. DLR, Assam read out the objections submitted by the firms against the NIT. Thereafter, the Committee decided to invite the representatives of the firms to deliberate their justification against the NIT submitted vide their petitions.

Deliberation on the justification of the firms are summed up as below:

1. M/s Trisita Marketing (P) Ltd. has raised objection about LED based specification only since the specification helped only one manufacturer to compete.
2. M/s J.K. Commercial has objected about consumption, connectivity in addition to specification of LED helping only one bidder to compete. ✓
3. M/s Swastik Systems has referred to unavailability of concurrent print, scan, copy in their make/product and omission of product patent if any. Also to make the specification generic.
4. M/s Computer World Services has put forward the view of better warm up time and scanning resolution of inkjet product over the LED make.

The other two petitioners viz., M/s Leisure Land, M/s J.S. Industries are absent.

The Committee requested the bidders who quoted for the above NIT to place their justification on the objection raised by the firms. The representative of M/s Comsol System stated that the product i.e. wide format printer (A0) quoted by the firm against the NIT is a colour LED multifunctional printer, 100% water proof, cut sheet facility. M/s Reprographics India has dittoed the observation.

The firms and bidders were then allowed to leave the meeting venue with the commitment that whatever decision is taken would be uploaded to the website of the Director of Land Records & Surveys etc., Assam which they would be able to see.

The Committee then discussed on the specification fixed and uploaded in the NIT and observed that the specifications were as per the requirement for printing of cadastral maps and strip maps.

However, since some objections have come up as discussed in the meeting, the Committee decided to obtain views from Survey of India regarding technical specification of the NIT floated for procurement of wide format printer (A0) and of the objection raised by the firms.

The meeting ended with vote of thanks from the Chair.
